

Useful information

- **Are the awards global?**
Yes, these awards can be won by a team based anywhere in the world. Just like engineering challenges they are not bound by any border.
- **Who is it for?**
In short, we are looking for teams of engineers of all types and sizes including multi and cross discipline. You can be a team of tech experts, mathematicians, scientists, or engineer's; or even a mix.
- **Does the team have to be of a certain size?**
They can be formed of any number of individuals and can include junior team members e.g., apprentices and early career technicians.
- **Does the work have to be charitable, or can we be a team from a corporate company?**
Whether the work delivered is in the public or private sector, all applications will be considered if applicants can prove that teamwork has enabled you to deliver impactful engineering solutions.
- **Why are these awards being offered from the IET?**
The IET wants to help inspire, and all teams applying to this award will share in the IET's mission to improve public understanding on the significance of engineering. We want to share your team's success story.
- **What are the IET looking for in award entries?**
Teamwork on a project made to improve quality of life, from the unsung heroes in the industry. If you feel you can demonstrate even an ounce of this, we want your team to apply.
- **Who is judging?**
Our award panel has been selected so that members' skillsets are aligned with the award categories.
- **How do I apply or nominate?**
You can apply directly for your team, or request someone nominates you – either is great. These awards are open for nomination or self-application; the more first-hand information provided, the better.
